Pre- Winter Storm Preparedness

Prepare for winter storm season with these propane safety tips. Mark your propane tank with a tall colorful flag. Dangerous roads might delay your propane delivery so always maintain an adequate supply in your tank. Consider using a standby or portable propane generator for energy backup and never bring any gas fueled equipment or appliances indoors. Create an emergency kit with instructions for turning off your homes utilities. For more advice call your propane retailer or visit usepropane.com. This message is sponsored by your local propane dealer and by the Wisconsin Propane Education & Research Council.
