

WISCONSIN BIOGAS CONFERENCE

Biogas Collaboration

August 4, 2016

CLEAN FUEL PARTNERS

BACKGROUND

- Incorporated Fall 2014
 - Research and experience led us to pursue anaerobic digestion and downstream treatment
 - Sought projects, new or existing
 - Visited Dane County Project in July 2015, closed purchase in December
 - Partner funded
- 

DANE COUNTY PROJECT COLLABORATION

- 3 farms
- Dane County
- Town of Vienna
- Regulators (DNR, EPA)
- Alliant Energy
- Substrate suppliers
- Fiber customers
- 85,000 gallons per day of organic waste

FUTURE CHALLENGES FOR BIOGAS

- We are in the organic waste processing business - AD/Biogas is only part of it. Our success depends on throughput
 - Quality substrates are important and harder to find
 - Increasing pressure on farms, governments and waste generators to clean up discharge streams
 - New projects will continue to be complicated:
 - Multiple stakeholders involved
 - Financial challenge of making treatment technologies work at small scale
-
